

The background features five stylized fish drawn in orange ink on a light beige, textured background. The fish are arranged with one in the center, one on the left, one on the right, one at the bottom left, and one at the bottom right. They are all facing upwards. The title '2nd Report' is written in a large, black, cursive script across the middle of the page, overlapping the central fish.

# MIMRA

Marshall Islands Marine Resources Authority is a company managed by Director Glen Joseph. Director Glen started his internship in the year of 1992 as an observer. He started officially working in 1996. In MIMRA, there are 8 department in total for internship.

1. Oceanic & Industrial Affairs
2. Legal Affairs
3. Observers
4. Marketing
5. RMI Competent Authority
6. Aquaculture
7. Remaanlok
8. Costal & Community affairs

## Recap

My first internship contact was the months of September & November. I was working under Oceanic & Industrial Affairs. During these times, I entered Log-sheets with Mr. Edgar, input FAD data, entered un-loadings with Mr. Dike, coral reef survey with costal, participated in the Book launch, workshop with Mr. Pete & Andrew and I also helped CA as their Photographer.

## **DEPARTMENT: CA (COMPETENT AUTHORITY)**

CA Advisor: Aquina Pyanne  
Lab Manager: Candice M. Guavis  
CA Officers: Tatiana Shoniber &  
Lyla Lemari

The purpose of the Competent Authority is to improve RMI's sanitary controls on the fish processing. CA works with 4 fishing companies; MIFV, KMI, PII, and PPF. The CA plan annual inspections, vessel inspections, water samplings, and meetings with these 4 fish facilities. The CA officers, Tatiana and Lyla, have countless numbers of papers that they fill out to enter into their data system. They inspect these 4 facilities with EU and RMI standards papers. Once they pass the RMI standards, then they continue trying to level up with the EU standards. They also have yearly annual reports that are posted on the MIMRA official website. They also have plans for our future generations. They do a lot of great things that impacts the people of the Republic of the Marshall Island.

# Overall Experience:

I never know how important the Fishery Industries/Marine life is for us, humans. For centuries, MIMRA has done a lot than I could ever image. These workers have dedicated their lives to help and protect the RMI in ways that people would never understand. They have create a strong team that works together despite all their differences and problems. I have finally found something that I want to continue studying on. After interning at MIMRA, I have set my goals for my next steps in life. I will be facing challenges that would help my grow as an individual. At the end of the day, I want to thank MIMRA for this lovely experience.
